

Dear Friends of Solar Under the Sun,

Each morning we are blessed with a gift that touches the lives of every human being—sunlight.

At Solar Under the Sun,

we are encouraged by the support of people like you
to magnify the gift of sunlight by providing solar power
to our sisters and brothers upon the planet.

Through the financial and human resources that are shared with our ministry,
the radiance of light creates the constellations of newness
that pierce the darkness and illumine an uncertain sky with the dawn of hope.

Consider how your donation blesses communities in Haiti with the gift of life through solar-powered water filtration systems.

Imagine the joy of the people in the village of El Sute, Honduras,
when their community church for the first time will be able to read the Word of God by
electrical light,
and their children can read and study at night through an installation supplied by Solar
Under the Sun.

Think of how solar power in the Ukraine, in Kenya, and in developing countries can offer
light where there has been darkness,
education where there has been illiteracy,
and new visions where there had been dead-ends.

As we approach the season where we share in the giving of gifts,
what greater gift could be given than the gift of life for our fellow human beings?
Through your donations and contributions to Solar Under the Sun,
people are blessed with a new reality, a new vision, a new world.

Similarly, an alternative gift to Solar Under the Sun
would be a wonderful way
to participate in God's mission
and greatly honor any person on your gift list.

Let me invite you and encourage you to share in our mission through sharing your financial and human resources with Solar Under the Sun.

May God's light
illumine you with grace,
warm you with love,
and provide the beacon to lead you on pathways of peace.

Blessings,

Tom Ulrich—Board President
